About Us

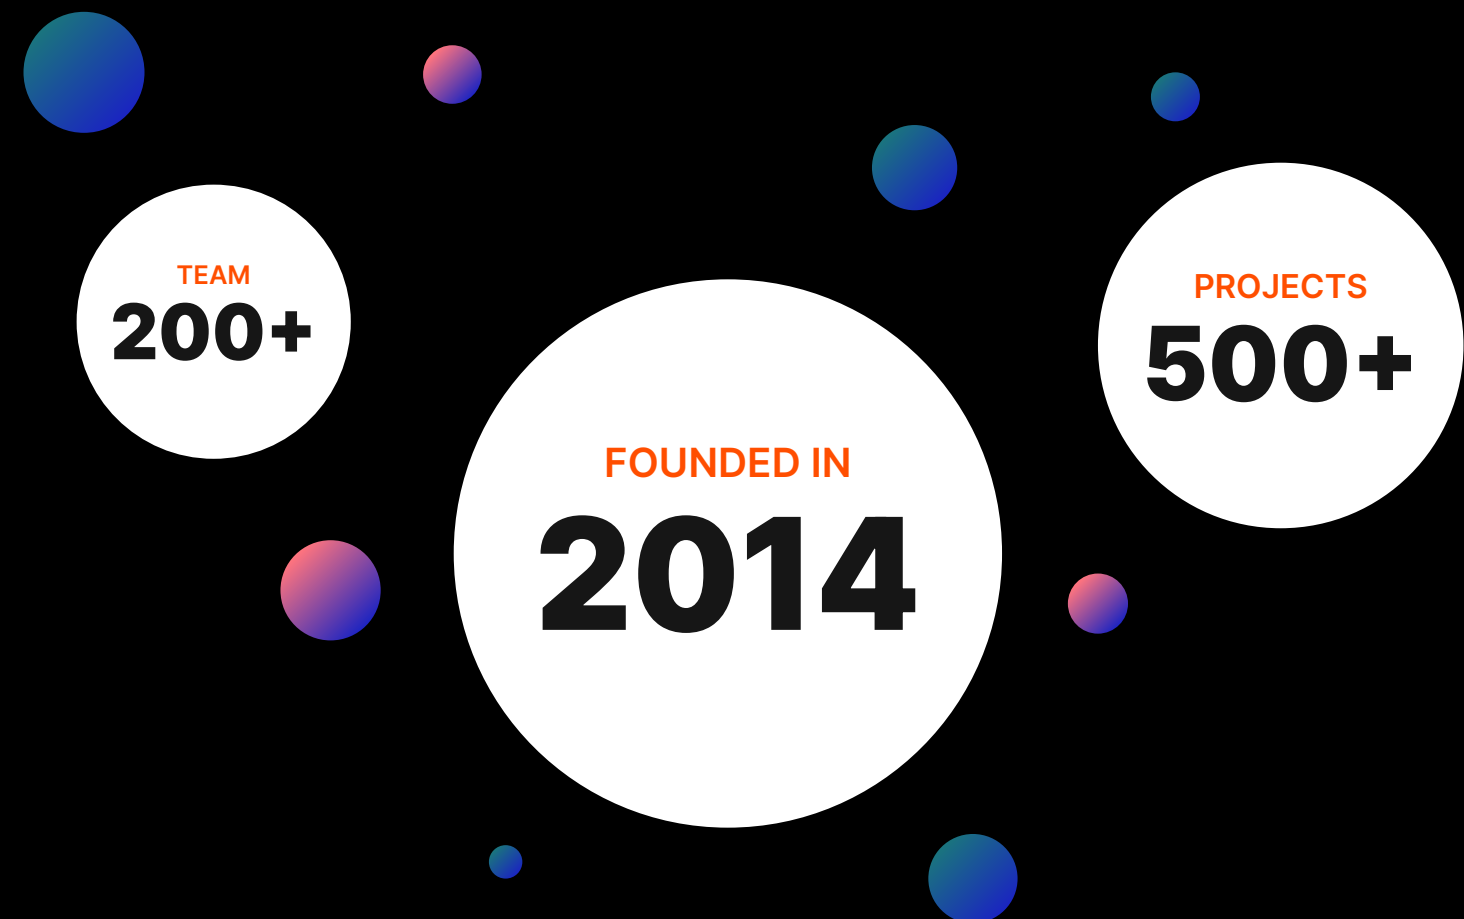

COMMITTED TO
THE FUTURE

We are a web and mobile app development company, working towards bringing a revolution in the digital space by empowering businesses with intelligent solutions and services.

We take the liberty of calling ourselves niche technology service providers with the aim of delivering quality solutions on time.

We are a team of radical thinkers who are at the forefront of the innovation to develop digital solutions backed by powerful technologies.

We combine bold strategies and transformative technologies to deliver our expertise in technology services and digital transformation.

Dimendscaasi Chicago

We have developed a professional online shopping solution for Dimendscaasi Chicago which offers an up-to-date inventory of diamonds imported from various third-party vendors. Customers can customize their ring of choice by selecting their preferred style, metal, and diamond, and previewing the ring before purchase. Customers can also book an appointment in-store for a consultation. Furthermore, customers can upload a photo of their hand to see how the ring will look on their fingers. These unique features have helped Dimendscaasi Chicago to increase customer engagement.

Honeywell

WebClues has developed a comprehensive app for Honeywell that provides an IoT solution for home and business automation. The app includes features to sign up, configure devices, integrate them with the gateway router, and set up notifications between devices for easy automation. The gateway router also provides notifications when sensors detect danger or events, ensuring a reliable automated safety system. WebClues has created a feature-rich and user-friendly app for Honeywell, providing customers with secure automation products for their homes and businesses.

Alo Yoga

We have developed an exclusive online Brand Store for Alo Yoga, offering customers an intuitive and user-friendly interface for product exploration. Customers can view the category and details of the products with ease, as well as gain exclusive access to new products before they are available in physical stores. Moreover, customers can place orders, apply promo codes, and get the product delivered to their doorsteps with a secure payment gateway. WebClues has developed both the website & app with best-in-class features, ensuring a seamless shopping experience for the customers.

Zemaas

We have developed multiple apps and a website for ZeMaas for its various services including mobility, food delivery, and logistics. The mobility platform allows users to book taxi rides, while drivers can register and accept rides. Users can mark favorite locations, give tips, and report any issues. Furthermore, the platform also offers a seamless food delivery experience for restaurant owners and customers, with the ability to register, manage online food orders, and track drivers in real time. We have also developed an extensive admin panel with detailed user and driver analytics, operator management, accounting, and more for all of its services.

Dubai Calender

We developed the Dubai Calendar app for the government, showcasing festivals, events, and exhibitions in the city. The app also displays the real-time number of visitors to Dubai. This was done with the help of an API integrated from the Dubai Tourism Department. Additionally, the app is regularly updated to keep up with the changing events in Dubai. The app is helping the Dubai tourism sector to increase its reach and maximize its revenue.

Aswaaq Online

Aswaaq Online is a hypermarket website that allows users to order groceries online and have them delivered to their doorstep. Customers can sign up and link their Wafa ID to create an account that is synced with offline stores and can add items to their cart and place an order. The platform allows for both online and offline purchases, and customers can choose to pick up their order from a store at a specific time. The website also allows admins to run multiple promotions simultaneously and sync orders and customer data to the Microsoft D365 ERP system.

Indian Railways

The Indian Railways app, developed by our team, has achieved over 1 million downloads and a 4.4 rating, providing users with an easy way to access train timetables, live location, and tracking of trains with just a few taps. The app also allows users to check their ticket status using their PNR, and search for trains between source and destination locations, making travel planning stress-free.

Peugeot

We are excited to professionally share our expertise in developing a website for the acclaimed French automotive manufacturer, Peugeot. Working closely with their brand, we have crafted features & elements to display the company's range of cars, including specifications, colors, and 360-degree views. The website showcases all of its cars to customers in a specific country or region, allowing users to browse and explore cars based on their preferences. This gives them an in-depth look into the cars before making their purchase. Our team of experienced designers and developers has worked diligently to accurately reflect the brand's identity and bring its vision to life.

Voscreen

VoScreen is a top-rated app for English language learning with over 1 million downloads and an average user rating of 4.4. It offers engaging lessons, interactive exercises, games, and readings. The app provides detailed explanations of vocabulary and grammar concepts, as well as quizzes and assessments to test students' knowledge and track progress. Users can ask questions, share resources, and receive support from other students and teachers. The app aims to provide an enriched learning experience and boost confidence in English studies.

MrpMoney

As an authorized Financial Services and Credit Provider, Mr. Price Money offers customers a wallet filled with different payment types, allowing users to stay on-trend and on budget. The website provides 6 or 12-month store card offers and a lay-by facility that enables customers to access their favorite fashion, home, and sportswear when they want it. Additionally, it provides users with a recharge facility where one can recharge from a variety of mobile data plans, including prepaid and postpaid.

Klipsch Connect

We developed the Klipsch Connect App to help Klipsch product users make optimum use of their Klipsch headphones or speakers through equalizers and sound effects. The Klipsch app is meant for Klipsch product owners wherein they can adjust the volume of the audio being played through their headphones. Different sound effects (bass, mid, treble) could be tuned to customize the sound of the audio being played. There are sound enhancement features, such as virtual surround sound, to improve the audio quality. The app further supports Bluetooth connectivity, allowing users to wirelessly connect their headphones to their devices.

Hubilo

This website offers a comprehensive platform for event organizers to manage their events and engage attendees. We have developed features to help event organizers view calendars of events that are scheduled to take place, and create detailed listings of events, including the date, time, location, ticket prices, and registration for events. With Hubilo, event organizers can also manage ticketing, seating charts, and attendee lists, making it a one-stop shop for event management. We believe that the website is the best resource for event organizers, and we are confident that it will help them make their events a success.

Celebfie

Celebfie is an innovative and cutting-edge mobile application that revolutionized the way people connect with their favorite celebrities. The app has various features like celebrities can register themselves, upload their profile picture and video, which users can then view. Through the app, users can contact the celebrity for any events and also purchase merchandise of the celebrity from the store. The app has been a huge success among celebrities and their fans and has helped create a platform for them to interact and engage with one another.

Skyloov

Skyloov is an innovative platform that provides a powerful search function for users to find properties. It offers detailed information about each property, including photos and key features, as well as panoramic 360 community views. Users can search for agents, agencies, and properties in their desired area, and can contact potential buyers or agents through a contact form, phone number, or email address. Skyloov makes it easy to connect with real estate agents, brokers, or buyers to discuss further details.

Tawuniya

Tawuniya is an app that allows users to purchase or renew their vehicle and medical/health policies. With just a few clicks, users can easily compare policies, customize their coverage, and purchase additional insurance products. The app also provides a secure payment system, detailed information about the policies, and a notification center to inform users of any changes in the policy. In addition, users can access a wide range of features, making the app an ideal choice for individuals looking for comprehensive insurance policies.

Regalos Publicitarios

Regalos Publicitarios website provides an easy and convenient way for users to explore and customize various merchandise items from different categories. Customers can order in a range of bulk quantities (from 1-100, 101-500, 501-1000, and more), and their prices will vary accordingly. Additionally, customers can order samples and ask for a budget, and can even upload artwork for customization. Furthermore, customers can keep track of their order's progress and have their customized merchandising delivered straight to their doorstep. Regalos Publicitarios offers a professional, efficient solution for all custom merchandise needs.

Subbie Me

Subbie Me is a professional all-in-one marketplace that provides an easy way for both contractors and subcontractors to connect and find new work. Through the app, Skilled workers or Subbies, such as electricians, plumbers, gardeners, and painters can register and present their skillset and portfolio of previous work, helping them to gain more job and contact inquiries. On the other side, users can also register and post jobs, view the available Subbies, and assign the job to the most suitable one. All this is easily done, allowing the trade industry to work more quickly and efficiently.

LaundroKart

LaundroKart has features to simplify and streamline laundry management. Administrators can manage pricing, pickup time slots, holidays, service areas, orders, and staff. Users can schedule pickups through the website or mobile app, specifying the date and time for pickup and delivery and selecting wash types. Notifications are provided for order status and payment can be made online or in cash. Delivery staff can use app to receive directions to the pickup location and update orders, while managers can accept and update orders and assign staff as needed. LaundroKart has over 100,000 users and 50,000+ downloads.

NewsPod

NewsPod is a news aggregator app designed to provide users with an unparalleled news experience. It offers users the ability to customize their news feed to their language, news topics, and locations, allowing them to access news from both national and regional providers. NewsPod also allows users to listen to news in their regional language with auto-play feature. Furthermore, users can bookmark stories that interest them and can build folders within the app to store their bookmarked news. Additionally, users can increase or decrease the font size of the content and can switch between dark and light themes according to their preferences. With its advanced features, the app has already earned a lot of traction with over 100K+ downloads.

Eat Well Nashville

Eat Well Nashville is a website that provides users with a convenient way to order healthy food online. The app has several amazing features that make it stand out from others. Firstly, it allows users to view the description and nutritional value of the food item before making a purchase. This makes it easy for users to make an informed decision about their food choices. Moreover, users can choose from a wide range of categories such as Bulk Protein, Keto, and Gluten Free, to order their favorite food. Users can also avail of special discount coupons and promo codes while placing their orders, making it easier for them to save money.

Padiatric Therapeutics

Pediatic Therapeutics is an app for healthcare professionals. It provides comprehensive information on the indications for which a drug is active and the correct dosage according to age. It also lists common pediatic problems such as arrhythmias, dehydration, neonatology topics, burns, and acid-base problems, with their current treatments. By signing up for the app, users can quickly search for diseases and receive essential information including symptoms, medicines, and dosage for various age groups. This app is designed to make life easier for medical professionals and provide them with the information they need to give the best possible care to their patients, thereby optimizing the process of patient treatment.

ProHoff

ProHoff is a robust real estate listing platform with a website and mobile application that allows users to rent properties with ease. It features a streamlined process in which property owners can register themselves, provide property details, set availability, and manage their properties through a secure dashboard. On the other hand, users can find the perfect space for their needs efficiently. It has a feature where users can chat with the property owners and can even book space on an hourly basis.
